with the **φ3.8 pin (13)**, making sure to place the pin through the holes on the bolt.

- ! The diameter of lock beam should be less than **7mm**.
- ! The lock is not included.

## Bike Installation Instructions

**!** Before placing the bicycle, stand up the support rod in the middle, snap the front tire of the ebike into the front wheel holder, place the rear tire in the beam, and then use the ratchet wheel straps to fix the front wheel, rear wheel, and seat tube of the bicycle as shown in the figure below.

**!** It's generally recommended that using the ratchet wheel strap to fix the crossbar (if applicable) or the middle tube (or seat post). Considering that some electric bikes have thicker downtubes, please do not strap the downtube.

**Note:** Use the ratchet wheel strap to fix and tighten the seat tube, middle tube, or the position of the crossbar near the seat tube/middle tube of the bicycle.

**Note:** Use the ratchet wheel strap to fix and tighten the front wheel of the bicycle.

**Note:** The rear tire fixing seat needs to be placed in front of the rear wheel.

## Bike Installation Instructions (tire width<2.5")

! If your tire width is less than 2.5", please use velcros to fasten the front and rear tires.

! Only 2pcs of **Velcro(14)** are required to fix the tires, the rest are for spare.

**Note:** The velcro fixes the front tire as illustrated

**Note:** The velcro fixes the rear tire as illustrated

## How to Adjust the Wheel Cradle

1.Pull the cam gear

2.Turn in counterclockwise

3.Slide it

4.Until it is against the tire

5. Fix by turning clockwise

6.Press it down

## How to Use the Ramp

**1.** Fix the buckle to the

## **WARNINGS**

- Do not overload beyond the bike rack's weight capacity of 100lbs.
- Do not carry more than 1 bike on the carrier.
- The bike rack is not intended for transporting humans or animals.
- If you are planning to load only one bike, it is recommended to place it in the position closest to the vehicle.
- All bikes must be secured properly before operating the vehicle.
- Make sure the front of the bike(s), when mounted, is at or above the bottom of the bumper to avoid damage to the bike(s).
- Do not carry flammable items on the bike rack.
- If using the bike rack to transport electric bicycles, please remove the batteries from the bicycles prior to transporting them. This will help reduce the weight supported by the carrier.
- During long trips, frequently check the straps and bike position, especially if traveling on rough terrain.
- Please do not make alterations to the product, as it can pose potential hazards to your safety.
- Failure to heed these warnings may result in personal injury and/or property damage.
- To prevent serious injury or death, inspect the bike rack for any signs of wear, corrosion and fatigue before each use. Do not use the bicycle rack if parts are bent, broken, deformed or missing. If parts are bent, broken, damaged or missing, remove the rack from your vehicle before operating the vehicle.
