

Personalizing Your Ornament

In order to personalize the name, and have it cut properly, it's a multiple step process.

1. Select the name and replace with the name you'd like to use. You can change the font as well, I chose this one because it looked casual, and was heavy enough to not be too fragile. This is an Adobe font - Manteiga Gorda, if you have an Adobe license, you can add it via <https://fonts.adobe.com/fonts/manteiga-gorda>

2. Convert the text to curves/paths:

Illustrator - select the text and choose **Text > Text to Outline**

Affinity - select the text and choose **Layer > Convert to Curves**

Inkscape - select the text and choose **Path > Object to Path**

3. Select the text and the snowflake

Illustrator - **Pathfinder > Unite**

Affinity - **Layer > Geometry > Add**

Inkscape - **Path > Union**
