

# CHIUCHIU FURNITURE

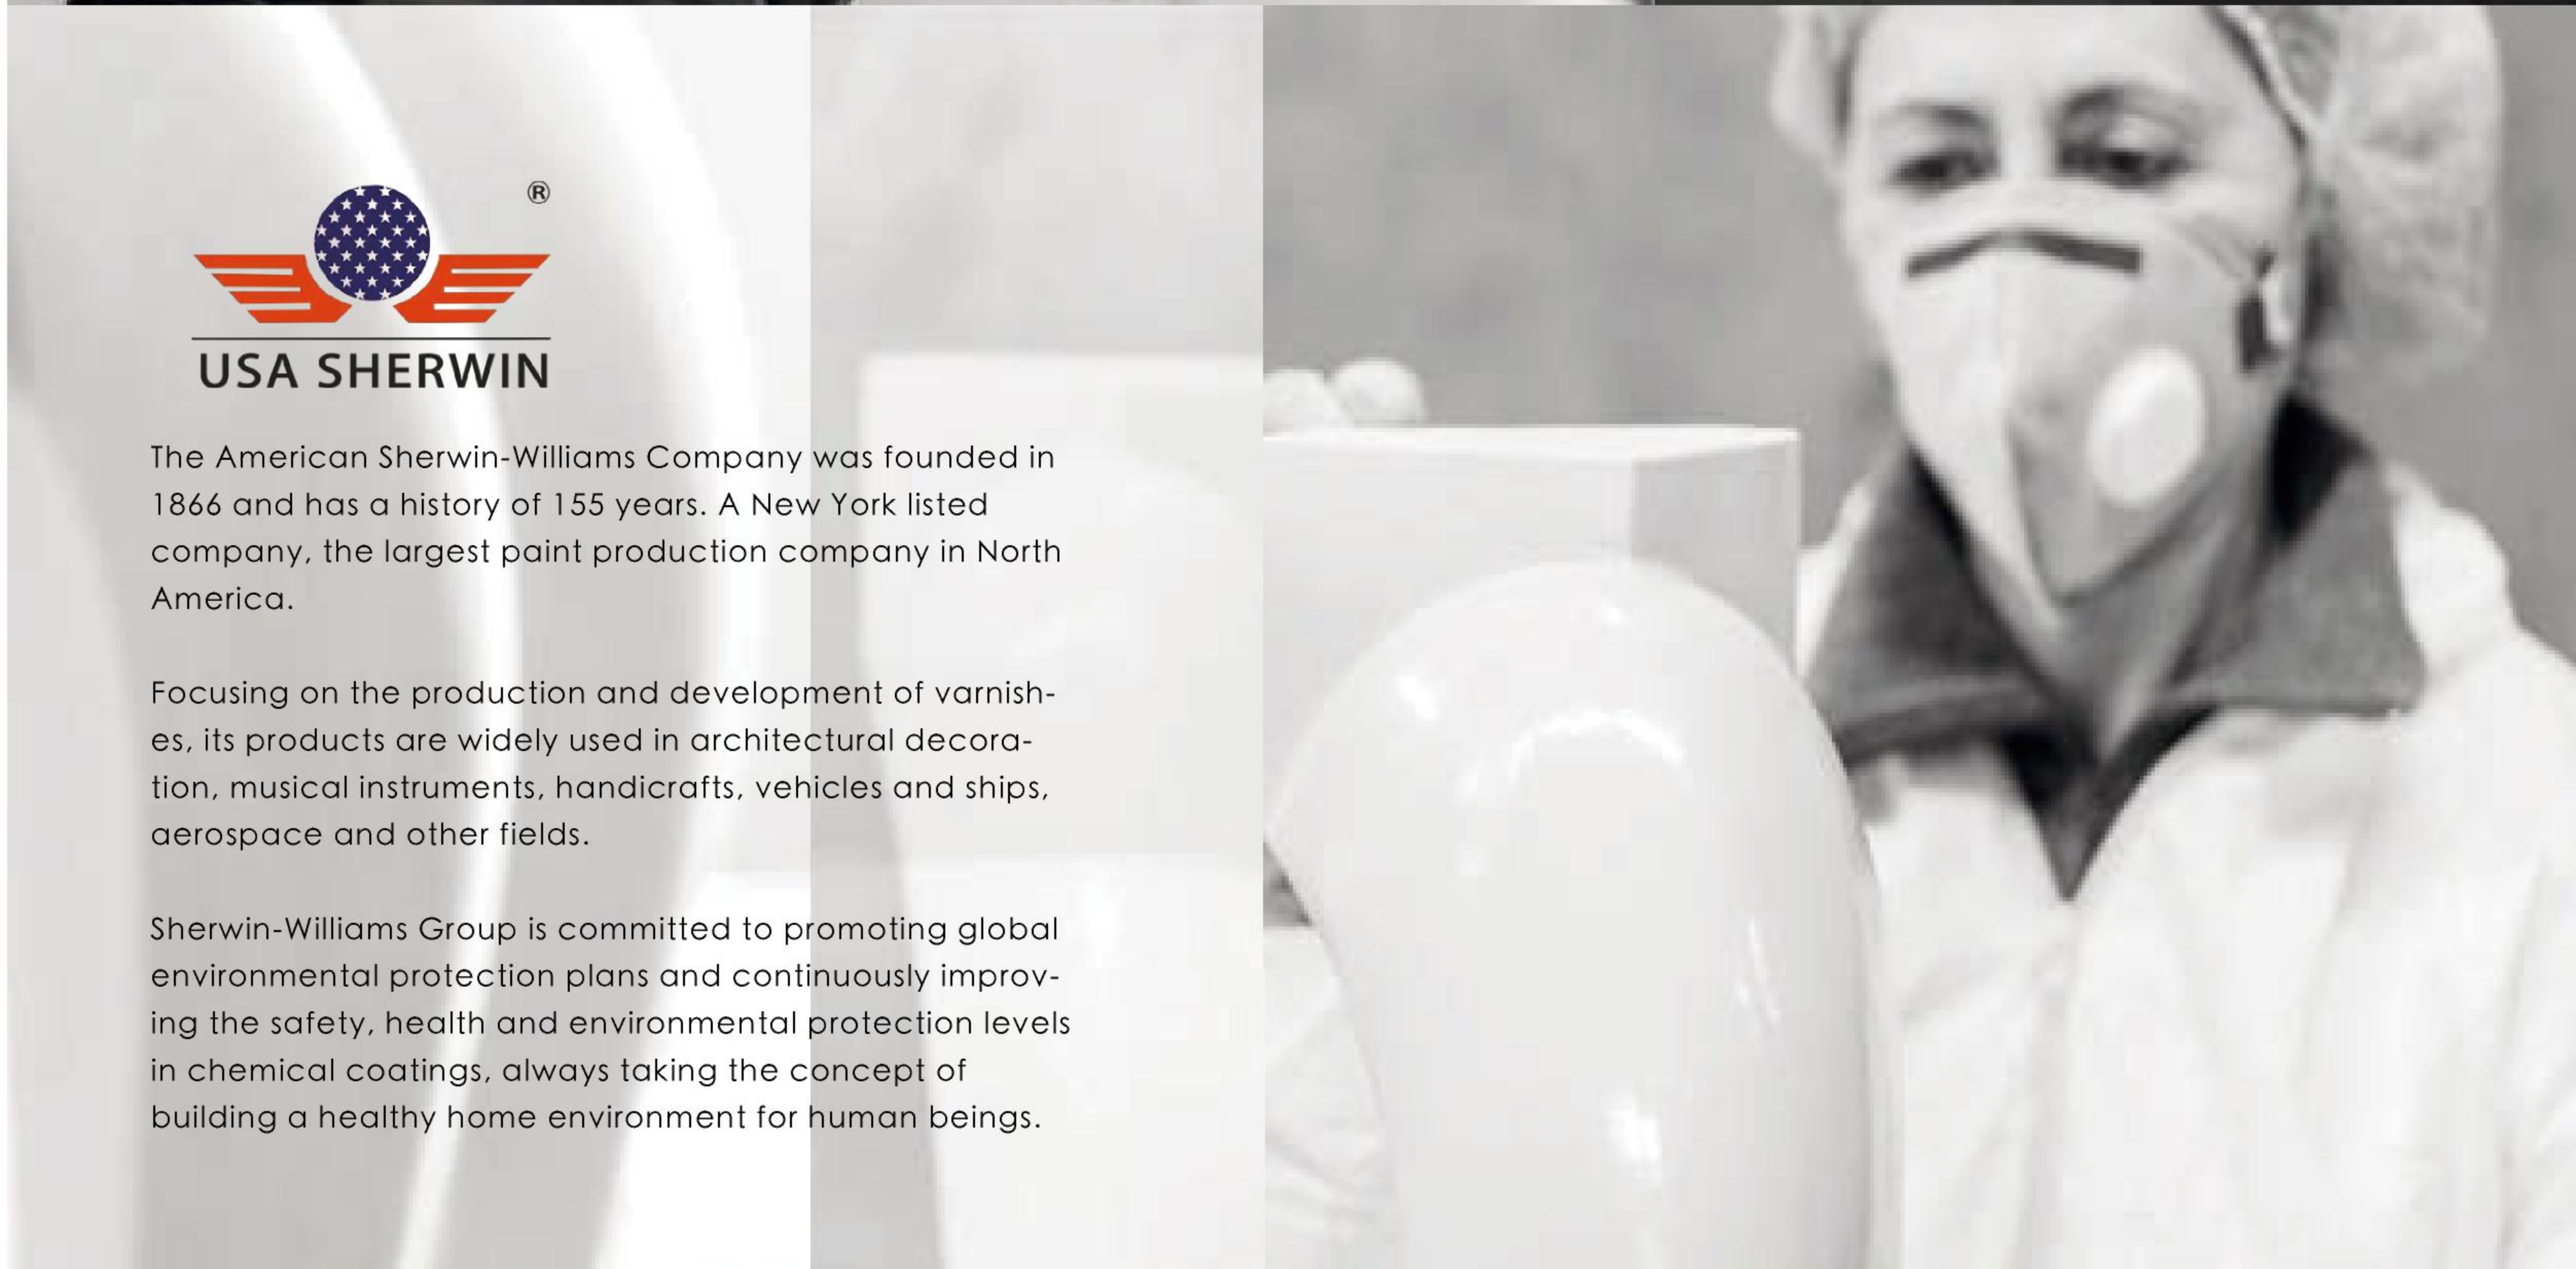

ChiuChiu Furniture 2022 PAINT Material

## PAINT 油漆

ChiuChiu Furniture pays attention to health and environmental protection, and uses American Sherwin Williams paint (Sherwin Williams) throughout the line. The furniture lacquer process is far ahead of the industry level. The paint surface has gone through 8 layers of paint (5 layers of primer and 3 layers of oil). Paint technicians with more than 20 years of industry experience strictly control the blending ratio of PE paint and blue-white water, and repeat spraying, grinding, and polishing by hand until the product paint surface reaches the EU hardness standard of 2H+ and the thickness standard of 1.2+MM, and guarantees the veneer. The texture is clearly visible.

The American Sherwin-Williams Company was founded in 1866 and has a history of 155 years. A New York listed company, the largest paint production company in North America.

Focusing on the production and development of varnishes, its products are widely used in architectural decoration, musical instruments, handicrafts, vehicles and ships, aerospace and other fields.

Sherwin-Williams Group is committed to promoting global environmental protection plans and continuously improving the safety, health and environmental protection levels in chemical coatings, always taking the concept of building a healthy home environment for human beings.
