Bucketball game

Package content

12 buckets
2 gameballs

How to play?

BucketBall is played by setting up two sets of 6 buckets in triangular formation separated 30 feet apart. Each player on a team tries to throw the ball into the opposing team's buckets. If a ball goes into a bucket, that bucket is removed from the game. The first team that makes all of the buckets first wins.

Play instruction:

Just fill them 1/3 of the way with sand or 2/3 of water and you're good to go! Made with 1.5mm thick plastic, you don't have to worry about these buckets breaking!
