

1. Each case contains 6 pieces of sheets labeled as 'A', 'B', 'C', 'D', 'E', 'F'

\*We provide a small bag with gloves, rubber bands, a clear round board and a cleaning cloth for each case.

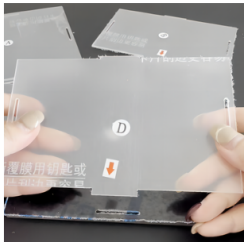

2. Peel off the protective films with a round disc. And clean the dust with cleaning cloth.

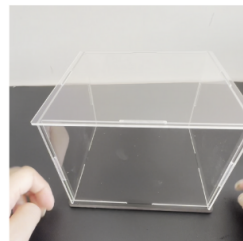

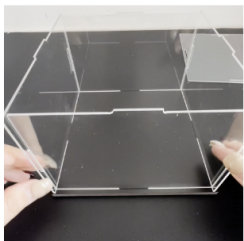

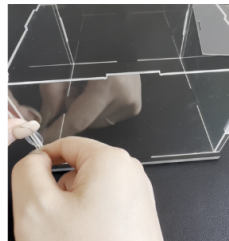

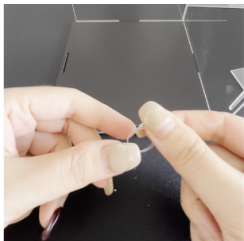

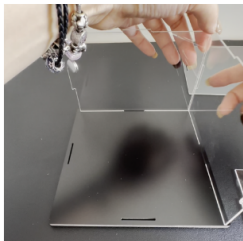

\*The clear round disc and cleaning cloth are packaged with the gloves. Or keys, nails or something hard that can help too

3. The protruding edge of "↓" is longer than the opposite one, and insert it to the bottom sheet 'F'.

4. Use the rubber bands to tie 4 walls of the case. The bands are packaged with the gloves

\*There's no producing edge on the top like other sheets, which is designed to allow another case overlays on it.

\*The case is designed for to who want to take it apart again in the future.
