For Gaahleri Airbrush GHAD-39 , GHAC-98D

www.gaahleri.com

1 BEGIN

UNLOCK ↓ Quick Disconnect (Sold separately)
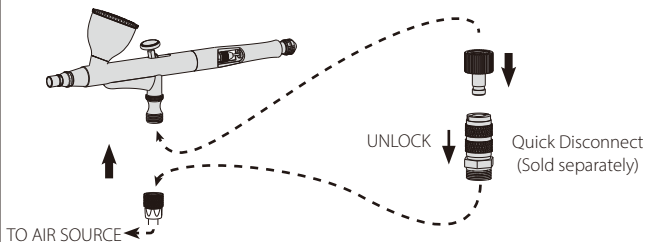

TO AIR SOURCE

Begin by attaching the end of an airbrush hose (1/8"BSP) to your airbrush.

Attach the male part to airbrush and the female part to air source, pull downside to unlock.
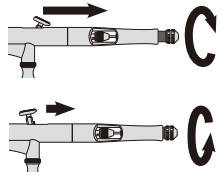

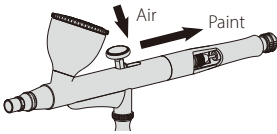

2 PAINT

LID

Paint

Paint

Put a few drops of paint in cup, dilute paints to look like milk if needed before pour into cup.

Put a drop or two of paint directly into the fluid cavity to get a better view.

3 START AIRBRUSHING

Air → Paint

Turn your air compressor on. Press down the main lever to release air flow, and pull back to release paint flow.

The preset fluid control knob (if equipped) can control the retracement of main lever.
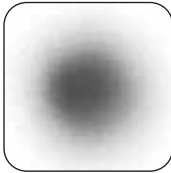

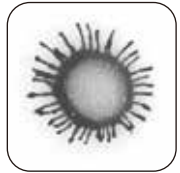

4 PERFECT SPRAYING EFFECT

Too thick.

Perfect

Too thin.

Dilute paint with THINNER.

Reduce air pressure. or Add undiluted paint.

ATTENTION
1. Please do some test on paper before painting. Use a tiny bits of paint or water.
2. DO NOT spray noxious, flammable, explosive material.
3. After finishing the work, please clean the airbrush as soon as possible (use airbrush cleaner).
4. Please take care when cleaning the needle and nozzle. Otherwise it may cause poor spraying effect, or even hurt yourself.
5. When not using Gaahleri airbrush for a long time, please clean it totally and place in good conditions.
6. Gaahleri airbrush is already pre-installed and full tested. If you have any question, please contact us through the email address provided at the end of manual.
