---

All of our painted door styles feature solid wood painted face frames. As with any painted wood surface, expansion and contraction with changes in climate may cause fractures in the paint surface at joints. This is an acceptable characteristic and will vary based on climate conditions. In addition, there may be a slight color shift over time due to continued exposure to both natural and artificial light.
Finished End

FINISHED END

Standard End Panels are ½” thick CARB2 plywood. Exterior laminate matches face frame finish.
