# CARE & MAINTENANCE

## FRAME

- Dust and dirt will collect on the frame and will require periodic cleaning.
- Use water or mild soap to clean.
- Be sure to drain any water accumulated inside the frames. Air dry or wipe with a soft clean cloth.

## CUSHION

- When the cushion becomes water-saturated, unzip the cushion cover to allow for ventilation and facilitate the drying process. Place the cushions upright with the zipper facing down to drain excess moisture more quickly.
- Store cushions indoors during inclement weather and rainy seasons.

## SUNBRELLA CUSHION FABRIC

- Dust and dirt will collect on the sunbrella fabric and will require periodic cleaning.
- Store it in a dry area and out of the elements when not in use or cover with commercially available outdoor furniture covers.
- Blot (don't rub) liquid spills with a clean, dry cloth.
- Brush off dirt before it becomes embedded in the fabrics and wipe up spills or clean soon after a spill occurs. The quicker you clean spills, the easier they can be to remove.
- Use water or mild soap to clean.
- Not machine washable.
- Solutions for fabric wrinkling.
  1. Use an iron on the synthetic setting. Avoid using steamers or the steam setting.
  2. Test a small, hidden area before ironing the whole piece due to varying iron temperatures.

### **Cleaning methods for different stains**

- Oil-based spills:
  1. Apply an absorbent such as corn starch, then remove with a straight edge.
  2. Spray on a mild cleaning solution of soap and water.
  3. Rinse the fabric thoroughly to remove all soap residue.
  4. Air dry.
- Mildew:
  1. Prepare a solution of 1 cup of bleach and 1/4 cup mild soap per gallon of water.
  2. Spray on entire area and allow to soak into the fabric for 15 minutes.
  3. Clean entire surface area with a sponge, clean towel or very soft bristle brush.
  4. Rinse thoroughly to remove all soap residue.
  5. Air dry.

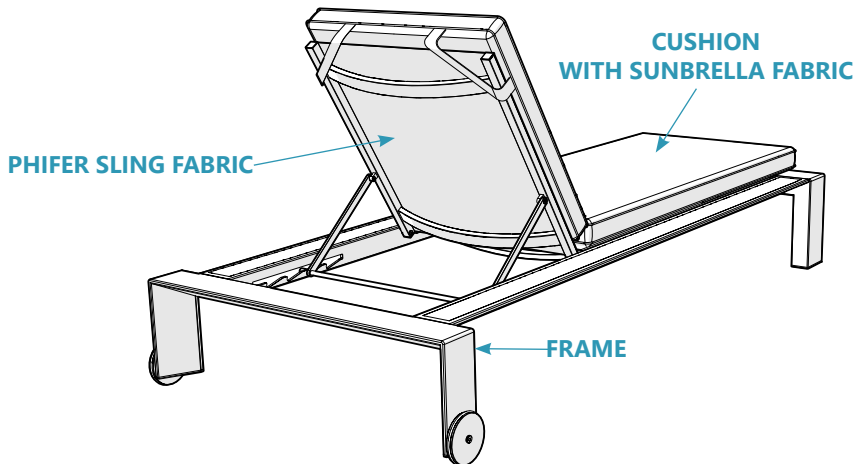

## PHIFER SLING FABRIC

- Monthly, rinse the textilene fabric with clean water.
- Immediately clean spills by blotting with a clean cloth to absorb as much as possible.
- Avoid contact with sharp or abrasive objects to prevent damage or cuts to the textilene fabric.
- During off-season or extreme weather conditions, clean and fully dry the textilene fabric, store in a dry, cool place away from direct sunlight, and avoiding humid or moisture-rich environments to prevent mold.

### Cleaning methods for different stains

- General Rules (Best Practices):
  1. Don't wait to tackle stains and spills.

- Mold/Mildew and Stubborn Stains:
  1. Brush off mold and mildew spots with a dry scrub brush or broom, removing as much dusty residue as possible.
