## Instructions

1. Use the big square pegboard for your project. For the original project, we use the mini beads C series. If you love midi, you can select midi S series. Now, place all the beads for the design.
2. Cover the completed design with the ironing paper or ironing film. Keeping the iron level, gently iron the beads in a circular motion for about seconds to fuse the beads evenly.
3. Peel off the ironing paper and lift your design from the pegboard. Flip the design over and repeat step #2. Your pegboard and ironing paper / ironing film are reusable.
4. Put the project under the book or something heavy after you iron it. Once the design is cool, remove the book.

---

**WARNING:** The ironing must be done by an adult only. Some irons may emit steam. Please keep children at a safe distance.
