

What Strength Reading Glasses do I need?

Use the eye chart below to determine what strength you need for your reading glasses.

Please read the following details to choose the best strength

1. Hold the chart 12 to 14 inches away from your face. If you're wearing reading glasses, be sure to take them off for the most accurate results.
2. Read the chart from the top down.
3. If you can't read the top line, just move down to the next.
4. Keep moving down until you can **clearly** read a full line
5. When you can clearly read a line, look at the strength listed for that line.

Look at your reading glasses strength!

If you can read this, **+1.00** is the right strength for you.

+1.00 Strength

If you can read this, **+1.25** is the right strength for you.

+1.25 Strength

If you can read this, **+1.50** is the right strength for you.

+1.50 Strength

If you can read this, **+1.75** is the right strength for you.

+1.75 Strength

If you can read this, **+2.00** is the right strength for you.

+2.00 Strength

If you can read this, **+2.25** is the right strength for you.

+2.25 Strength

If you can read this, **+2.50** is the right strength for you.

+2.50 Strength

If you can read this, **+2.75** is the right strength for you.

+2.75 Strength

If you can read this, **+3.00** is the right strength for you.

+3.00 Strength
