Hydraulic Hole Puncher

OPERATION INSTRUCTION

Introduction

Split-unit hydraulic hole puncher is combined with hand pump and machine tools. The hose is connected by quick connectors. It has the advantages of reliable seal, no limited work direction, easy installation and disassembly. It is specialized for angle steel, flat steel and other material's hole punching, especially for electrically and electric power building and other industry's filed operation.

Specification

Model	Copper Thickness	Steel Thickness	Tonnage (T)	Throat Deep(mm)	Weight (kg)	Dies Disposition (Φ mm)
CH-60	10mm	6	31	95	18	10.5,13.8,17.5 20.5
CH-70	12mm	8	35	110	36	10.5,13.8,17.5 , 20.5

Remark:

1. Add 15# mechanical oil when the hand pump empty absorbed. The injected oil must be filtrated by 200# filtration net, in order to avoid the interfusion of impurity.
2. This tool also can be used with 70MPA eclectic pump.
