反面 ▶

OPTICAL IN Source

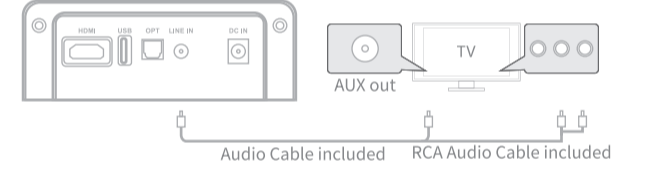

1. Ensure that the soundbar is connected to the TV or other audio devices via an optical cable.

2. Press the Optical button on the remote control to enter the Optical input mode. You can also short press the "C/M" source button on the soundbar to choose the Optical source.

Note: The playback is controlled by your device and the button on the remote control. Before use, you need to unplug the cover.

LINE IN Source

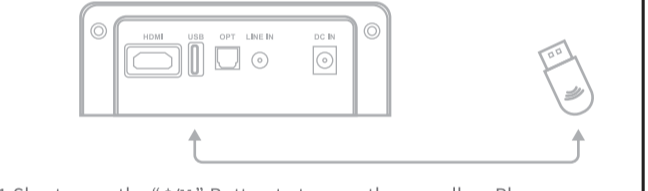

1. Ensure that the soundbar is connected to the TV or other audio devices via a 3.5mm/RCA audio cable.

2. Press the LINE IN button on the remote control to enter the mode. You can also short press the "C/M" source button on the soundbar to choose the LINE IN source.

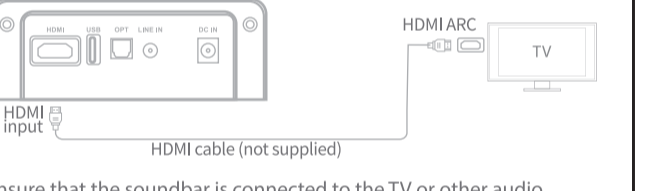

Note: The playback is controlled by your device or buttons on the remote control.

USB playback

3. Short press the "C/M" button to turn on the soundbar. Plug your USB flash drive into the USB port and the soundbar will play the music in your USB flash drive. You can press "EQ" or "EQ" button on the remote control to switch between your music.

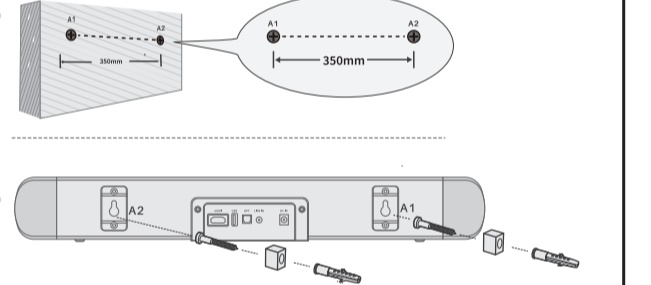

HDMI(ARC) source

Ensure that the soundbar is connected to the TV or other audio devices via an HDMI(ARC) cable. Press the HDMI button on the remote and play.

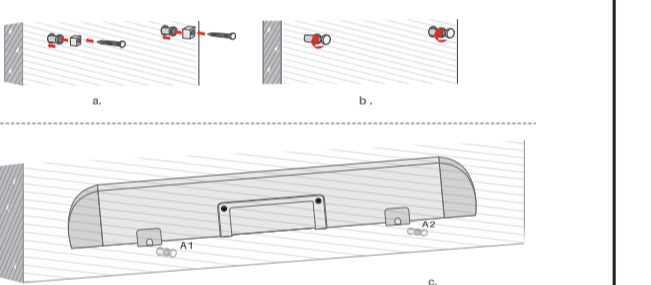

Note: The device can synchronize the volume with the TV as well as the switch.

Wall mounting guide

1. Mark the position points on the wall. Choose the mounting height and Mark A1, Mark A2 on the right of A1 on the same horizontal line. The distance between the 2 points should be 300mm exactly.

2. Drill the holes. Drill holes in the marked position.

3. Hang up the soundbar. Insert the wall plugs into the holes. Tighten the screws into the plugs through the foam pads. Hang up the soundbar on the screws.

QA

Q1. Pairing connection via Bluetooth cannot be completed.

Once you connect a device to the soundbar, the connection will be stored. When you turn on the soundbar, the Bluetooth connection will be activated automatically. To connect another device to the soundbar, you need to disconnect the former connection first: turning off Bluetooth on your former device, or clearing the former connection by pressing and holding the Bluetooth button on the remote control for 3 seconds. After that, you can find and connect the other devices.

Q2. Why there is no sound output from the soundbar when I connect it to my TV set?

Please make sure that the TV has an audio output interface.
 Please set the TV to digital audio output and select PCM output.

Q3. The Bluetooth connection is not stable.

There should be some obstructions between the soundbar and your Bluetooth devices which interfere with the connection. Please remove them. The supported range for the Bluetooth connection is around 10 meters indoor. Please do not exceed that range.

Q4. Silent play after connection via Bluetooth.

After connections with mobile devices, Bluetooth device audio is off. Turn on the mobile's output volume.
