

machinery control transformer

JBK5 series machinery control transformer is produced by high permeability material, Silicon sheets, bottom plate and silicon sheets are welded in a group by arc, Frame is simple, Bottom plate increases the reliability to the GND by using anti-corrosion alloy material ,Crimp terminal using group structure, increases the Electrical clearance & creepage distance and cable intensives, Protection class IP20, To prevent the risk of occasional access to the circuit, the transformer are used for 50-60Hz AC, Primary voltage is no more than 500V, secondary rated voltage is no more than 400V, can be as the general electric control power in mechnical equipment in industry, the power of Work lighting and signal lights.

Product application

- Power industry
- •Oil industry
- Military engineering
- •Chemical industry

Product advantage

- •Good stability
- •Low noise
- Power is sufficient
- •Small idle current

Product features

- single crystal copper enameled wire
- •High quality iron core-H18/0.35(annealing)
- •EI silicon steel sheet adopts joint welding technology, Low loss, Low temperature
- •Reasonable structure, Easy installation, Low noise, Strong earthquake

Typical technical index:

•Material of core—Silicon steel sheet

•Insulation grade: B grade (130°C)

• Operation temperature — $-30 \,^\circ \text{C} \sim +40 \,^\circ \text{C}$

• Frequency range—-50Hz \sim 60Hz

•Fair resistance: with UL94-V0

•Form test: Pri./Sec.3.5KV AC/1min 5mA (Multiple output: Sec.500V AC/1min 5mA) (The samples for it is destructive experiment of samples, not recommended for normal use) Factory test: Pri./Sec.3.5KV AC/1s 5mA, (Multiple output: Sec.500V AC/1s 5mA)

Electrical parameters: (The following parameters are typical values and actual values will be subject to product testing)						
Primary input voltage	110	220	380	V	Cu ex	
Primary input voltage range		± 10		%	Ot ex	
Power		100		VA	R	
Voltage regulation	10			%	F	
No load loss	9			VA	F	
Weight		2		Kg	F	

Remarks:

Customizable other voltage inputs. example: Between $0 \sim 660 \text{ v}$				
Other input ranges can be ordered example: $\pm 20\%$				
Rated power				
For reference only				
For reference only				
For reference only				

Secondary output full load voltage Single	Secondary no-load voltage Single	Secondary full load current Single	1. Can be customized according to customer requirements output Voltage/current to each according to his need	
7.5V	8.3V	13.3A		
9 V 1 0 V		11.1A	2. If not specified, the secondary output is full load voltage	
12V	13.2V	8.3A	(customized no-load).	
15V	16.5V	6.6A	3.Transformer input/output for communication	
18V	20V	5.5A		
24V	26.4V	4.1A	Do the rectification notice	
24ν	20.40	4.1A		
110V	121V	909mA	4. Other types can be customized	
220V	242V	454mA	tap pressure	
380V	418V	263mA	frequency shielding

Standard product wiring schematic diagram:

Remarks:

•Represents the same end No. 2 terminal is high pressure regulating tap

Terminal 3 is rated input voltage No. 4 terminal is low pressure regulating tap
